● Bronze is unquestionably the most beautiful of all metals. And because of its beauty and workability, it is particularly suited for the production of memorial markers and urns. Furthermore, bronze is virtually indestructible and defies the ravages of time and the elements. Bronze markers are fitting memorials that will endure through the ages. These markers will not chip, and cannot be damaged by grass cutting equipment.

Monze

Markers

All markers are made of virgin bronze with lettering, borders and ornamentation hand-chased and burnished for contrast. They are available in a wide range of standard designs and sizes, and may be mounted flush with the ground or on bronze or granite bases. Religious, fraternal and military emblems may be used. If some specific design is required to meet individual specifications, we shall be glad to submit sketches and quote prices.

Genuine Bronze for Permanence

Memorial Urns may be used with any grave marker. Urns are made of imperishable bronze, and not only provide a receptacle for flowers, but enhance the beauty of the grave marker. Bottom of the urn can be made to resemble a rosette, or it can be plain, carry an insignia, or other ornamentation.

This photograph shows the urn in position to receive flowers. It may be used in winter as well as summer because the urn cannot be damaged by freezing. Urn is fastened to the marker with a heavy bronze chain to protect it from theft.

Here the urn is in closed position. It is simply inverted and dropped into a heavy bronze tube extending 10½" below the marker. Note that the rosette design at the bottom of the urn becomes an ornamental part of the marker. No. 493—24" x 12" with urn.
